SECTION I. BACKGROUND, OVERVIEW, AND GOALS

A. Background

The City of Greeley is a home rule municipality with a council-manager form of government and is the county seat and the most populous municipality of Weld County, Colorado. Greeley is in northern Colorado and is situated 52 miles north-northeast of the Colorado State Capitol in Denver. According to the U.S. Census Bureau, the population of the city is roughly 111,000 which makes it the 12th-most populous city in Colorado. The City has an annual budget of ~\$490M with a fiscal year that starts Jan 1st, and employees over 1100 employees. Greeley is a major city of the Front Range Urban Corridor and home to the University of Northern Colorado which is a public baccalaureate and graduate research university with approximately 12,000 students and six colleges as well as Aims Community College, which has served the community since 1967.

B. Overview

The City of Greeley is seeking proposals from qualified and experienced contractors to provide improved alley trash and recyclables services in downtown Greeley. This voluntary three-year pilot initiative in the 9th Street Alley, aims to enhance the cleanliness, aesthetics, and overall environmental quality of our downtown through the collaborative collection of trash and recyclables. Per Colorado Statute (2016 Colorado Revised Statutes Title 30 - Government – County Powers and Functions Article 15 - Regulation Under Police Power Part 4 - General Regulations § 30-15-401. General regulations – definitions) businesses will still be able to choose their own trash company if they desire. Currently the trash and recyclable collection is handled by multiple contractors with upwards of 16 plus rollable dumpsters. The City, with the support of the local property owners and the Downtown Development Authority (DDA), are excited to move forward this process that will not only improve the safety and cleanliness of the alley but also decrease truck traffic and improve emissions. This pilot, and associated procurement process may be expanded upon to other locations in the future if the City decides to expand the program.

C. Goals

The solid waste services provided through this collection contract will provide quality solid waste service that is economically and environmentally beneficial to the City and its residents. The city has identified three primary goals for this pilot:

Increase Cleanliness and Safety - It is the City's intention to improve the safety and cleanliness of our downtown area through improved containers and enhanced trash services operating in the identified pilot area. Lessons learned from this pilot project will be applied to a larger approach to how trash is managed in our downtown and beyond.

Traffic Impacts Associated with Waste Collection Vehicles – Currently, there are up to five heavy waste collection companies picking up trash within the pilot area. Reducing the number of haulers will decrease traffic and reduce potential safety conflicts, noise, emissions and road wear and tear.

Provide Data to Track Pilot and Determine Next Steps – Utilize data from this pilot to determine next steps related to the management of trash in Greeley that meets the goals and objectives of the City of Greeley's 2037 Vision.

SECTION II. STATEMENT OF WORK

A. Scope of Services

The selected contractor shall be responsible for the following:

Trash & Recycling Collection: Regular and timely collection of trash from designated alley locations within the 9th Street Downtown Alley ([map](#)). Frequency of service is at the discretion of the selected contractor and can be based off access to real-time volume data from collection devices. Proxy card access will be required by those depositing trash and/or recyclables into the containers to ensure only property owners and their tenants will have access to these containers. The following table provides the current frequency of pick-ups per week in this alley.

Property #	# & Size of Trash and/or Recycle Units (in yards)	Current Frequency of pick-ups per week
1	Two - 3-yard Trash and 2 3-yard Recycling	Twice a week
2	One 2-yard Trash	Once per week
3	One 3-yard Trash	Once per week
4	Two 3-yard Trash and 2 3-yard Recycling	Twice a week
5	One 3-yard Trash	Twice a week
6	One 3-yard Trash	Twice a week
7	One 3-yard trash	Once every 2 weeks
8	One trash Poly Cart (65 gallons)	Once per week
9	One 3-yard trash	Three per week
10	One 3-yard trash	Once per week
11	One 3-yard trash	Twice per week

Service Area Map (Green Area):

The City plans on purchasing and placing approximately 10-12 of the 3.5-4 Cubic Meters above ground containers in the alley. The selected contractor is expected to ensure containers are always kept at a level where they can accept trash and recyclables.

Collection Equipment and Staffing: Selected contractor will be responsible for providing the necessary staffing and equipment to provide timely collection. The City has decided to move forward with the use of Van Dyk above ground trash collection units. The selected contractor will be responsible for the cleaning of the containers and for any damage caused to the containers while servicing the containers. The City will take responsibility for the maintenance. As the City understands this new type of container may require specific equipment, there is a specific section within the response that will require the respondent to outline their approach to these requirements. The city is open to supporting the purchase of specialized equipment to service these containers.

Information on the containers can be found within Exhibit 5 while information on the recommended equipment for collection provided by VanDyk can be found below:

Recommended Truck Spec for VConsyst Containers

Crane:

The crane of the assembled truck is the most important aspect of the collection vehicle for VConsyst containers. This crane should be versatile, service friendly, and reliable. We recommend that the crane have the capability to service a large radius around the truck and not just on one side of the truck. This allows the flexibility of placement of containers and will also give more freedom to the hauler to complete service without the potential of awkward/dangerous vehicle placement during service. In addition to a large radius, the crane should also have a far reach.

Recommended Attachment for Kinshofer hook:

To safely and properly service a VConsyst container with a Kinshoffer hook we recommend the use of the AW Material AWC-M attachment. This can be bolted to most cranes and is operated hydraulically with ½ connections.

Body:

The body also does not need to be specific. A compacting body to maximize capacity and containment of materials that come from the container is recommended. Open top bodies also will work and can be attractive to haulers if they intend to use this truck for more than one application like brush pickup or bulk trash pickup. Some body manufacturers offer the ability to have both a crane and a rear loader to maximize the capabilities of the truck. Having the ability for both of these functions would be optimal.

Coordination with City Authorities: As this is a pilot program, the City expects the selected contractor to collaborate with city authorities to ensure compliance with local regulations, reporting, ordinances related to waste management and the facilitation of the goals and objectives of this pilot.

Reporting: Submit monthly reports, along with bills, on the volume of trash and recycling collected, recycling efforts, and any issues encountered during service provision. All reports shall be written and electronically submitted. They shall supplement data provided in the contractor's monthly invoices. The contractor shall maintain all records for a minimum of three years. Contractor records shall be available at all reasonable times for inspection by the City.

B. Period of Award

The expected start date for service is March 1st, 2024. The contract will be for 1 year with the option for four (4) additional years at the city's discretion. The contractor is to outline their annual increase factor in their response.

If the City desires to extend the contract, no later than thirty (30) days prior to expiration, the City's Purchasing Contact may send a notice in writing to the vendor requesting firm pricing for the next twelve-month period. After the City evaluates the firm pricing proposal from the vendor, it will determine whether to extend the contract. All awards and extensions are subject to annual appropriation of funds. The provisions of the foregoing paragraphs with respect to extensions of the terms of the contract shall be null and void if the contract has been terminated or revoked during the initial term or any extension thereof. All decisions to extend the contract are at the option of the City.

C. Minimum Mandatory Qualifications of Offeror

The consultant team proposing on these qualifications shall meet the following minimum qualifications for their submittals to be considered for evaluation. Any firm (including any sub-consultant firms) NOT meeting a minimum qualification will be disqualified and the qualifications will not be considered.

- A clean record on SAM.gov and,
- Required licenses and permits necessary to provide the services in State of Colorado.
- Five (5) or more years of service in the waste collection industry.
